GENERAL EXAMINATION RECORD (continuation)

LABORATORY
REFERENCE NO.

2015-FS-012153

Marks on the jacket possibly included a triangle.

Possible that this is one of the elements from the shoes of the deceased but there is really insufficient detail/resolution of marks for any meaningful comparison.

Vest examined under VSC - no additional detail noted.

To be forwarded to MEL for treatment then re-exam if anything else observed.

Spoke to MEL - no additional marks visualised -; not examined further by Chemistry.
